

SCHEMA (06/03/2013)

3.0 PATIENT ELIGIBILITY AND EXCLUSIONS

3.1 Eligible Patients **(06/03/2013)**

- 3.11 Patient must consent for the appropriate surgery (see Section 4.0).
- 3.12 Patients with a histologic diagnosis of squamous cell carcinoma, adenocarcinoma or adenosquamous cell carcinoma of the cervix, Stage IA1 (LVSI+), IA2, and IB1 (tumor size [maximum visible or palpable] \leq 2cm), any grade.
- 3.13 All patients must have undergone a cone biopsy or LEEP procedure. Depth of invasion must be \leq 10 mm.
- 3.14 Patients must have no evidence of metastasis on PET Scan or MRI or CT scan of the pelvis and chest imaging. **(09/14/2015)**
- 3.15 Patients who have met the pre-entry requirements specified in Section 7.0.
- 3.16 Patients must have signed an approved informed consent and authorization permitting release of personal health information.
- 3.17 Patients must be \geq 18 years of age.
- 3.18 Patient must have GOG performance status of 0, 1, or 2.

3.2 Ineligible Patients **(06/03/2013)**

- 3.21 Patients with Stage IA1 disease who are LVSI negative.
- 3.22 Patients with Stage IB1 with tumor size (maximum visible or palpable) $>$ 2 cm.
- 3.23 Patients with \geq Stage IB2 disease.
- 3.24 Patients with clear cell or neuroendocrine cell types.
- 3.25 Patients with depth of invasion $>$ 10mm on first cone biopsy (or LEEP).
- 3.26 Patients with a history of other invasive malignancies, with the exception of non-melanoma skin cancer, are excluded if there is any evidence of other malignancy being present within the last five years. Patients are also excluded if their previous cancer treatment contraindicates this protocol therapy.
